EXAMINER'S AMENDMENT

1. Product claims 10-12, 25 and 27-29 are allowed. Therefore, in view of Office practice under *In re Ochiai*, method claims 22-24 are rejoined and subject to examination on the merits. The following Examiner's Amendment conforms the scope of claim 22 to the scope of the allowed product claims, thus rendering claims 22 and 24 allowable and claim 23 superfluous.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tanya A. Arenson on August 5, 2004.

The application has been amended as follows:

Amend claim 22 as follows:

22. (Amended) A method for screening compounds for the ability to alter Nod2 activity, comprising:

a) providing:

i) a first polypeptide sequence comprising [at least a portion of Nod2] one of SEQ ID Nos. 2, 3 or 34;

Art Unit: 1653

- ii) a second polypeptide sequence comprising at least a portion of a protein known to interact with Nod2, wherein said portion is known to interact with Nod2; and
 - iii) one or more test compounds;
- b) combining in any order, said first polypeptide sequence [comprising at least a portion of Nod2], said second polypeptide sequence [comprising at least a portion of a protein known to interact with Nod2], and said one or more test compounds under conditions such that said first polypeptide sequence, said second polypeptide sequence, and said test compound interact; and
- c) detecting the presence or absence of an interaction between said first polypeptide sequence [comprising at least a portion of Nod2] and said second polypeptide sequence [comprising at least a portion of a protein known to interact with Nod2].

Cancel claims 1-9, 15-21, 23 and 26.
